PROFESSIONAL SUMMARY

Data Analyst with a strong foundation in SQL, Python, Excel, and Tableau. Having experience in cleaning and analyzing big size datasets to find insights and make visualizations that help stakeholders for data-driven decisions. Also having good knowledge of machine learning useful for analysis.

WORK EXPERIENCE

DATA ANALYST INTERN, SmartBridge

07/2025 – 10/2025

- Cleaned and Transformed multiple datasets using SQL(Postgresql) and Python(Pandas, NumPy), improved accuracy by 18% along with reduced processing errors.
- Conducted exploratory data analysis (EDA) that identified 35% data-quality improvements, enabling more informed business decisions.
- Collaborated with 5 team members on real-world analytics projects to design and execute data-driven solutions, resulting in a 15% improvement in project delivery schedules.

Projects

iPhone Revolution in India (2006-2022), | SQL, Excel, Tableau

07/2025

- Examined Apple's iPhone growth, sales patterns, and competitive positioning in the Indian market by analyzing 17 years of smartphone market data (2006–2022).
- Gathered, cleaned, and integrated multi-year datasets using SQL and Excel to ensure accuracy and consistency for analysis and visualization.
- Developed Tableau dashboards and stories that showcased a 20% increase in sales during the festival season and growing iPhone adoption, enabled strategic decisions.

NEET 2024 Result Analysis & Prediction,

08/2025

| Python(pandas, numpy, scikit-learn), Machine learning, Tableau

- Analyzed NEET 2024 data from more than a million records to understand student performance patterns and regional variations across 29 states.
- Used Pandas and NumPy for preprocessing, and applied Scikit-learn K-Means clustering and Random Forest models for trend identification and score prediction
- Incorporated predictive insights into Tableau stories to compare actual and predicted outcomes, increasing accuracy of data interpretation and educational analysis by 35%.

Smart Agriculture Analytics & Recommendation System,

09/2025

| Python(pandas, duckDB), Machine learning, Tableau

- Developed a data-driven agriculture system that uses several datasets to analyze crop yield, production, and suggestions for more effective farming.
- Constructed an Analytical Base Table (ABT), conducted EDA, and standardized and integrated three datasets (Crop Production, Yield, and Recommendation) to train machine learning models for crop pattern recognition.
- Achieved 99% model accuracy and supported data-informed agricultural planning by developing Tableau dashboards and a Streamlit web application for real-time crop recommendations based on soil ,Temperature, weather & other data.

SKILLS SUMMARY

Technical skills	Libraries & Frameworks
Python, SQL, R, Excel, Tableau, Power BI, Machine learning	Pandas, NumPy, Scikit-learn, Matplotlib, DuckDB

EDUCATION

D Y Patil School Of Engineering And Technology	Pune,India
Bachelor of Technology - Computer Engineering	06/2022 -08/2026
Dayanand Science College	Latur,India
Higher Secondary Education - Science	06/2019 - 03/2021

CERTIFICATES

- Google Data Analytics (Google)
- Deloitte Australia Data Analytics Resume Snippet (Deloitte)
- Data Visualisation: Empowering Business With Effective Insights (Tata)
- Getting Started with Data (IBM)
